

We recently received the following letter. Published by the Communist Party of Peru (PCP), the letter was written by a revolutionary prisoner at El Frontón in the hours before their death at the hands of the Peruvian armed forces and government headed by Alan García. A note from the PCP at the end of this combatant's letter comments on its form and publication.

Proletarians of all countries, unite!

# Nothing Nor Nobody Will Be Able to Defeat Us Shining Trench of Combat "El Frontón"

June 19, 1966

"With deep affection for love of truth and Freedom, nothing remains in my hands from the Shining Trench of Combat except the cintras of the prisoners of war whose bodies today lie cowardly scattered, and the world, History, the masses will judge these war criminals vicious. All men of Earth will see them in the dock and they will be sentenced, on such war criminals, they surely must be trampling today. Nothing nor nobody will be able to defeat us, the flow of the river grows naturally, overflowing in a Lane.

There is a light: Reactionaries cause trouble and fail until their doom. The people also have their Lane, struggle, fail. Struggle again, we might fail again. And again struggle until we achieve that final Victory that calls to us. The spilt blood are banners that call on all the people to achieve what we have so dearly fought for: power. we are condemned to triumph it is a beautiful sentence we have been born to triumph

This is already a great reality. they can crush us. Blow us into a million pieces, but they will not be able to break our morale. Communist! march

We are willing to die the morale of our class is at stake, we must defend it, and we will do it with blood pain and tears. it can't be any other way, it is the only way to blow them to smithereens, and we will achieve it in an intense storm.

In their desperation the reactionaries are more frenzied, only that we never have any reason to do it. Only to show the world the reactionary class nature that they are defending, more no longer exists as such except to strictly change the world in the image of the working class, of its organized vanguard, the C.P.

AM! Only war moves men so profoundly down to the last fold of their soul from singing to crying and from crying to singing there is truly no other way we have chosen, freely and voluntarily this hard, prolonged and bloody road of the victorious and invincible people's war that the Party and our people are carrying out, so it is natural for the reactionaries to react in this manner we have been wisely told

the more low down they get the deeper the reactionaries dig their own grave that is the way it is, that is the way it will always be.

As a Combatant of this heroic Shining Trench of Combat that has tenaciously resisted the bombings of the reactionary and genocidal Armed Forces, disgrace of

the national heroes. Courageous to kill cowardly to die. They know how to kill but they don't know how to die.

They will see they will find out, the people will never forget the blood spilt by its best sons and daughters.

People Betrayed by all the world your communist sons and daughters of war will not let you down, especially in this very moment.

we raise high the red flag of Communism. We have a brilliant future.

what else could we do, our destiny is to triumph.

the last word is that we are winning.

Our fight is pure for our cause for Communism.

We will talk of other matters some other day.

I reaffirm my commitment

to our revolution to the world revolution to the blood of our people to our fierce combatants to the blood of our communist comrades that flows in a torrent doing away with the old and bringing forth the new.

Never again will I see their faces their smiles but they live in my heart I will be the banner of their ideals.

that are the same as mine that are those of our people.

I will follow their example, fighting for our people serving the people from the bottom of my heart without any ulterior personal motive.

with no personal interest whatsoever.

LONG LIVE Chairman Gonzalo Guarantees of triumph!

Long live the PCP!

Glory to the fallen guerrillas

A Combatant"

NOTE: Letter of a combatant, member of the People's Guerrilla Army, written June 19, 1966, DAY OF HEROISM, in the midst of the heroic resistance of the rebellion against genocide, when the sinister reactionary armed forces, headed by the genocidal assassin, Alan García, attacked the shining trench of combat of "El Frontón." It was delivered before death. We publish it as we received it, unedited, so that history may record it.
